EDUCATION

MLR Institute of Technology, Hyderabad

Computer Science and Engineering

Aug 2023 - May 2027 (expected)

7.0 CGPA

PROJECTS

Flight Booking Application  | *NodeJs, MySQL, RabbitMQ, Express, Sequelize, node-mailer, node-cron*

- Developed a **microservices-based Flight Booking System** with 4 services: Flight Search, Auth, Booking, and Reminder and an Api Gateway, using Node.js, Express, MySQL, and **RabbitMQ**.
- Integrated **cron jobs**, rate limiter, Nodemailer, and Sequelize ORM with **migrations**; implemented **input validation**, **caching**, **pagination**, and **API Gateway routing**.
- Designed with **clean architecture**, leveraging **OOP**, reusable **CRUD repositories**, and **custom error handling** for maintainability.

VideoTube  | *NodeJs, MongoDB, CORS, Multer, Cloudinary, MongoDB*

- Backend for a **YouTube-like platform** using Node.js, Express, and MongoDB with modular architecture and clean controller separation.
- Supports **video uploads**, comments, likes, tweets, subscriptions, with media uploads managed via **Multer** and **Cloudinary**.
- Integrated **mongoose-aggregate-paginate-v2** for pagination, **CORS** for cross-origin requests

NetworkSecurity  | *Python, FastAPI, MLflow, AWS EC2, Docker, MongoDB*

- Developed a robust **MLOps pipeline** to classify phishing data as malicious or safe using multiple ML models (Logistic Regression, KNN, AdaBoost, Decision Tree, Random Forest).
- Automated **data ingestion, validation, and transformation** through ETL pipelines with MongoDB and generated reusable **preprocessing artifacts**.
- Implemented **experiment tracking** and **artifact versioning** using **MLflow** and **DagsHub**, ensuring reproducibility and efficient model selection.
- Built and deployed a scalable **FastAPI** web application on **AWS EC2**, using **Docker containers** managed via **AWS ECR** and automated **CI/CD pipelines** with **GitHub Actions**.
- Achieved a fully operational, end-to-end **network security system** with **real-time phishing detection**, cloud storage, and automated deployment, ready for production use.

TwitterBackendClone  | *NodeJs, Express, MongoDB, CORS, Multer, Cloudinary, MongoDB, cookie-parser*

- Developed a **scalable Twitter-like backend** using Node.js, Express, and MongoDB, with core features like tweets, replies, likes, user auth, and follow relationships.
- Structured codebase with **OOP principles**, splitting logic into clean, reusable **class-based controllers**, middlewares, and utility modules — enabling **modular imports** across multiple files.
- Integrated **JWT** for auth, Cloudinary + Multer for media, **cookie-parser** + **CORS**

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, HTML, CSS

Frameworks: ReactJs, NodeJs, FastAPI, LangChain, RabbitMQ

Databases: MongoDB, MySQL, PineconeVectorDB, Mongoose ODM, Sequelize ORM

Other Domains - MachineLearning: Machine Learning, GenAi, DeepLearning, MLOPS

CERTIFICATIONS

Advanced Learning Algorithms

Deep Dive into Deep Learning

Deep Learning for Natural Language Processing

Reinforcement Learning

Deeplearning.ai -Stanford

Scaler

NPTEL

NPTEL

ACHIEVEMENTS

- Runner ups in **Zignasa2k24** - Domain of DataScience
